

Maximize Reimbursements
and Optimize Workflow

Reimbursement Performance

To stay competitive, outpatient pharmacies are looking for every advantage to increase their financial, clinical and workflow performance while also strengthening customer relationships.

RelayRx™ Reimbursement Performance from RelayHealth includes valuable solutions that help outpatient pharmacies:

- Increase third-party reimbursements
- Increase patient adherence
- Reduce medication errors and improve patient wellness
- Improve workflow and efficiency

Increase Third-Party Reimbursements

Pre and Post Editing Services (PPE) deliver valuable claims edits specifically for outpatient pharmacies, including:

- AWP Comparison
- DAW Appropriateness for Multisource Brands
- Usual & Customary Third-Party Paid
- Quantity/package size
- NDC/NPI Validation

AWP Resubmission Services alert you to claims that were paid using outdated average wholesale pricing (AWP) and enables automated resubmission of these claims for increased reimbursement opportunities.

Increase Patient Adherence

eVoucherRx™ automatically applies paperless electronic coupons toward a patient's out-of-pocket costs on qualified prescriptions, removing any cost-prohibitive barriers to filling the patient's prescription and helping to ensure your patient receives the desired prescribed medication.

Reduce Medication Errors and Improve Patient Wellness

RxSafety Advisor™ Premium provides real-time notifications to pharmacists to reduce risk for look-alike/sound-alike dispensing errors. It also provides dosage screening for drugs targeted to pediatric and geriatric patients.

NotifyRx™ delivers actionable information at the point of dispense – such as drug recalls, formulation changes, and safety alerts – so your staff can adjust and/or notify patients accordingly.

Risk Evaluation and Mitigation Strategies (REMS) enables you to easily comply with the FDA-mandated REMS program for select medications, ensuring your pharmacy can dispense these high value drugs while providing your patient with valuable medication information aimed to reduce potential complications.

Improve Workflow and Efficiency

PriorAuthPlus™ powered by CoverMyMeds® automates the prior authorization resubmission process from the pharmacists to the prescriber and provides online visibility into the approval process. This means pharmacists spend less time on prior authorization paperwork and more time on other higher value tasks.

With market-leading clinical, financial and patient connectivity solutions, RelayHealth provides the access and tools to improve patient care, enhance financial management and interact with patients and other healthcare providers. Put these advantages to work for you and experience the benefits of Health Connections Brought to Life™.
